

Course Curriculum

BACHELOR OF SCIENCE (Hons.) INFORMATION TECHNOLOGY Sem-5 and 6

The Course Curriculum of Bachelor of Science (Information Technology) was proposed and drafted by **Academic and Curriculum Committee of Computer Science and Information Technology** under the Faculty of Science in the meeting held on 21-07-2025 and recommended to '**BOARD OF STUDIES**' for approval.

Prof. Jayesh Pushtiwala
Chairman, Academic
& Curriculum Committee
Science

Place of the meeting
SarvajaniK University Office

Sign

The proposed Course Curriculum was approved by **Board of Studies; Science** under the Faculty of Science in the meeting held on 08-08-2025 and was recommended to the '**FACULTY**' for approval.

Dr. Chaulami Desai
Chairman,
Board of Studies- Science

Place of the meeting
SarvajaniK University Office

Sign

The Course Curriculum approved by the **Faculty of Science** in the meeting held on 08-08-2025 and was recommended to '**ACADEMIC COUNCIL**' for approval.

Dr. Chaulami Desai
Chairman & Dean,
Faculty of Science

Place of the meeting
SarvajaniK University Office

Sign

The Course Curriculum approved by the '**Academic Council of SarvajaniK University**' in the meeting held on 22-08-2025.

Mr. Ashish Desai
Member Secretary,
Academic Council
& I/c. Registrar,
SarvajaniK University

Place of the meeting
SarvajaniK University Office

VISION

To provide equal opportunities for value based global education for creating an Enlightened Society

MISSION

To establish and facilitate educational institutions in the region for providing affordable value based global education to all who aspire to study and to create opportunities to educators, social workers and philanthropists to serve society

| | |
|-------------------|---|
| Purpose of Course | The purpose of course is to make students use the four types of NoSQL Databases (Document-oriented, Key Value Pairs, Column-oriented and Graph). |
| Course Objective | To provide Fundamental knowledge of the detailed architecture, define objects, load data, query data and performance tune NoSQL databases. |
| Pr-requisite | Basic understanding of Database Concepts. |
| Course Out come | After completing this course, a learner will be able to identify what type of NoSQL database to implement based on business requirements, can able to apply NoSQL data modeling from application specific queries |
| Course Content | <p>Unit 1: Database Basics [6 Hrs]</p> <p>1.1 Type of Database Systems</p> <p>1.1.1 Relational Database Design</p> <p>1.1.2 E-commerce Application</p> <p>1.1.3 Early Database Management Systems</p> <p>1.1.4 Flat File Data Management Systems</p> <p>1.1.5 Organization of Flat File Data Management Systems</p> <p>1.1.6 Hierarchical Data Model Systems</p> |

Unit 2: Variety of NoSQL Databases

[6 Hrs]

2.1 Data Management with Distributed Databases

2.2 Store Data Persistently, Maintain Data Consistency, Ensure Data Availability

2.3 Balancing Response Times, Consistency, and Durability
Consistency, Availability, and Partitioning: The CAP Theorem

2.4 ACID and BASE

2.4.1 ACID: Atomicity, Consistency, Isolation, and Durability

2.4.2 BASE: Basically Available, Soft State, Eventually Consistent

Unit 3: Types of NoSQL Databases

[8 Hrs]

3.1 Key-Value Pair Database

3.2 Document Database

3.3 Column Family Databases

3.4 Graph Databases

3.5 Time-series Database

3.6 In-Memory Database

Unit 4: MongoDB Database

[12 Hrs]

4.1 The Document Data Model

4.2 Documents and Collections, Mongo Shell

4.3 Working Database – create, drop

4.4 Working with collections – create, drop

4.5 Working with Document – Adding batch of document, find document, modify document, find selected fields, removing document

4.6 Indexing, Writing to Shards

4.7 MongoDB as a File System

Unit 5: Neo4j - Graph Database

[6 Hrs]

5.1 The Graph Databases – navigational db, relational db, NoSQL db

5.2 Neo4j building blocks, Key value stores

5.3 Cypher Query Language – Nodes, relationships

| | |
|----------------|---|
| | <p>Unit 6: Firebase [6 Hrs]</p> <p>6.1 Introduction to Firebase</p> <p>6.2 Working with real-time data</p> <p>6.3 Firebase Environment setup</p> |
| Reference Book | <ol style="list-style-type: none"> 1. Designing Data-Intensive Applications By Martin Kleppmann-O'Reilly 2. NoSQL for Mere Mortals® By Dan Sullivan-O'Reilly 3. ARTIFICIAL INTELLIGENCE-I

| | | | | | | |
|---|--------------------|-----------------------|----------------------|-------------------------------------|--|--------------|
| Name of College: Shree Ramkrishna Institute of Computer Education and Applied Sciences | | | | | | |
| Faculty | Science | Program | | B.Sc. Information Technology | | |
| Year | 2025 | Version | | 1.0 | | |
| Semester | V | Effective From | | April, 2025 | | |
| Course Code | BSCS32505 | Course Name | | Artificial Intelligence -I | | |
| Teaching Scheme | | | | Examination Scheme | | |
| Credits | Lecture (L) | Tutorial (T) | Practical (P) | Continuous Assessments (CCE) | Semester end examinations (SEE) | Total |
| 4 | 4 | - | - | 40 | 35 | 75 |

| | |
|--------------------------|--|
| Purpose of Course | The purpose of the course is to establish foundations of concepts, approaches, methods and techniques artificial intelligence |
| Course Objective | This subject aims to create a solid foundation in the principles and techniques of Artificial Intelligence, enabling them to understand, analyze, and apply AI concepts to solve problems and develop intelligent systems. |
| Pr-requisite | Basic concepts of Data Structure and Algorithms |
| Course Outcome | After completion of this course, the student will be able to understand and solve real world AI problems, application areas and state of the art AI concepts which are being used in practical implementation. |
| Course Content | <p>Unit 1 Introduction to AI [6 hrs]</p> <p>1.1 Types of Intelligence, Human Vs. Machine Intelligence, 1.2 Composition of intelligence - Reasoning, Learning, Problem Solving, Perception, Linguistic Intelligence 1.3 AI Agents & Environments -Human agent, robotic agent and software agent, ideal rational agent, structure of intelligent agents 1.4 Types of Agents</p> <p>Unit 2 : Problem Solving By Search [7 hrs]</p> <p>2.1 Problem Formulation and State Space Representation 2.2 8-Puzzle, 8-Queens, missionaries and cannibals problem, Robot Navigation Problem, Water Jug Problem 2.2 Search techniques for Solution Search 2.2.1. Uninformed search strategies - BFS, DFS 2.2.2 Informed search strategies</p> |

| | |
|---|--|
| | <p>Unit 3 : Planning [4 hrs] 3.1 Planning Problem - Air cargo Transport, spare tire problem, the blocks world 3.2 Planning with state space search, Goal stack planning, Plan Space Planning</p> <p>Unit 4 : Knowledge Representation [5 hrs] 4.1 Knowledge-Based agents, systems & Machine Intelligence 4.2 Overview of Logical and Procedural Representation Schemes 4.3 Structured Representation Schemes - Semantic Network, Description Logic, Ontology, Conceptual Graphs 4.4 First Order Predicate Logic and Rule Based Systems</p> <p>Unit 5 : Real Life Application Areas of AI [6 hrs] 5.1 Expert Systems - Characteristics, Importance, Applications, Examples, Rule based system architecture 5.2 Robotics-Sensors and Effectors, Applications, Robotic Perception, Movement Planning 5.3 Natural Language Processing 5.4 Generative AI and Language Modelling</p> <p>Unit 6 : Introduction to LLM [7 hrs] 6.1 Language Modelling 6.2 Large Language Models 6.3 Applications of LLMs 6.4 Types of LLMs</p> <p>Unit 7 : Prompt Engineering [7 hrs] 7.1 What is Prompt 7.2 Prompt Designing 7.3 Task Formulation using Prompts 7.4 Prompt Patterns 7.5 Prompt Tuning Techniques</p> <p>Unit 8 : Introduction to Langchain [7 hrs] 8.1 Langchain Framework 8.2 Langchain Use cases 8.3 Langchain Tools</p> |

| Purpose of the Course | The purpose of the course is to make students capable of concepts to protect valuable information and systems from unwanted access and attacks. |
| Course Objectives | This subject aims to cover various privacy techniques on digital assets, ensuring data availability and mitigating risk. Learning cryptosystems and ways to move towards Cybersecurity culture to Global security. |
| Pre requisite | Basic concepts of computer systems and networks |
| Course out come | After completion of this course, the student will able to understand the importance of data protection and take career paths towards cybersecurity |
| Course content | <p>1. Introduction to Information Security [6 Hours]</p> <p>1.1. Computer security, Information security, Threats, Attacks, Malicious Logic, Need of information security.</p> <p>1.2. Principles of CIA concepts: Policies , procedure, guidelines and standards from security perspective.</p> <p>1.3. Administrative measure and technical measure to enforce CIA (goals/foundation of IS)</p> <p>1.4. Security risk at common ports and services, Risk at esource sharing, User account configuration in operating systems.</p> <p>2. Cryptography [6 Hours]</p> <p>2.1. Evolution and history of Cryptography</p> <p>2.2. Cryptanalysis and cryptosystems</p> <p>2.3. Monoalphabetic and polyalphabetic ciphers</p> <p>2.4. Applications of cryptography</p> <p>2.5. Benefits and limitation of cryptography</p> <p>2.6. Future of cryptography (Quantum, Blockchain, Post-Quantum)</p> <p>2.7. Types of cryptography</p> <p>2.8. Challenges in cryptography.</p> |

Course content

- 3. Symmetric Key Cryptography (Stream and block) [9 Hours]**
- 3.1. Stream based Cryptography - Traditional/Classic/Substitution Ciphers (Caesar cipher, Vigenere cipher, Substitution cipher, Monoalphabetic and polyalphabetic cipher, Transposition cipher, Playfair cipher, ZEBRA technique, Railfence cipher, hill cipher)
 - 3.2. Block cipher - BLOWFISH
 - 3.3. Data Encryption Standard - DES and Tripple DES
 - 3.4. Advance Encryption Standard – AES
 - 3.5. Contemporary symmetric cipher
- 4. Asymmetric Key Cryptography [9 Hours]**
- 4.1. Rivest-Shamir-Adelman – RSA
 - 4.2. Diffie-Hellman key exchange
 - 4.3. Digital signature standard – DSS and digital certificate
 - 4.4. Elliptic curve digital signature algorithm – ECDSA
 - 4.5. Elliptic curve cryptography – ECC
 - 4.6. Kerckhoff's principle for cryptosystem
 - 4.7. Secure soceket layer - SSL
 - 4.8. Hash algorithm – MD5, SHA1
- 5. Introduction to cyber crime and cyber offences [9 Hours]**
- 5.1. Introduction to cybercrime, types and category of cyber crime
 - 5.2. Techniques of Cyber Crimes
 - 5.3. E-Mail spoofing, Spamming, Cyberdefamation, Salami attack, Data diddling, Hacking, Online fraud, Software Piracy, computer Sabotage, Email bombing, Computer network Intrusions, Password sniffing, Credit card frauds
 - 5.4. How criminal plans attacks
 - 5.5. Reconnaissance attack, Active attack, Passive attack, Scanning and scrutinizing of information, gaining and maintaining system access
 - 5.6. Cyberstalking:- Types of cyberstalking, cases of cyberstalking, how stalking works
 - 5.7. Botnets and Honeypot
- 6. Cyber Crime: Mobile and Wireless Devices [9 Hours]**
- 6.1. Proliferation of mobile and wireless devices in diverse environment
 - 6.2. Types and techniques of debit and credit card frauds
 - 6.3. Security challenges and system settings for mobile devices
 - 6.4. Authentication services security for mobile devices
 - 6.5. LDAP Security of hand-held mobile devices, RAS security for mobile devices, Media player control security and DRM, Network API security for mobile computing applications
 - 6.6. Attacks on mobile phones
 - 6.6.1. Phishing, Vishing, Smishing
 - 6.6.2. Types of Bluetooth vulnerabilities - Hacking bluetooth
 - 6.6.3. Unconventional Storage Device threat through stolen devices
 - 6.6.4. Protecting data on lost device
 - 6.6.5. Organizational Measures for handling Mobile devices
 - 6.7. Computer languages in cyber security.
- 7. CyberSecurity Frameworks [6 Hours]**

| | |
|------------------------|--|
| | <p>7.1. Framework needs, objectives, components 7.2. NIST Network safety system (CSF) 7.3. NIST Risk management framework (RMF) 7.4. Government hazards and approval (FedRAMP) 7.5. SANS Basic security controls 7.6. Benefits and limitations of cyber security frameworks.</p> <p>8. Cyberspace [6 Hours] 8.1. Need and importance of cyberspace 8.2. Inherent characteristics of cyberspace 8.3. Forms of cyberspace regulations 8.4. Cyberspace regulatory 8.5. Industry best practices</p> |
| Practical | <p>Web Link for Practical application:</p> <ul style="list-style-type: none"> ● Crypto Hashes and Collisions Practical Cryptography for Developers ● Programming Languages for Cryptography Cryptography Guide ● Nmap: the Network Mapper - Free Security Scanner ● How Does Trend Micro Smart Protection Server Work? |

|-------------------|---|
| Purpose of Course | The purpose of the course is to make students capable of implementing concepts, methods, tools and techniques studied in practical courses and activities of software engineering |
| Course Objective | <ul style="list-style-type: none"> • Introduce the fundamental concepts and principles of system analysis and design in the context of software development. • Enable students to identify, analyze, and document system requirements effectively. • Develop the ability to design logical and physical models of systems using appropriate tools and techniques. • Familiarize students with different system development life cycle (SDLC) models and their applications. • Equip students with skills to prepare professional system documentation and communicate technical designs clearly. |
| Pr-requisite | Knowledge of latest technologies, tools and software engineering |
| Course Out come | <ul style="list-style-type: none"> • Understand the role of system analysis and design in software project development. • Apply requirement gathering and analysis techniques to define system specifications. • Use diagrammatic tools such as DFDs, ER diagrams, and UML diagrams to represent system requirements and designs. |

| | |
|----------------|---|
| | <ul style="list-style-type: none"> ● Evaluate different SDLC models and select appropriate methods for a given project. ● Design logical and physical system models for real-life business applications. ● Prepare clear and well-structured system documentation. ● Demonstrate teamwork and communication skills in presenting system analysis and design work. |
| Course Content | <p>Project Documentation (As per standard academic format)</p> <ol style="list-style-type: none"> 1. Title Page 2. Certificate 3. Acknowledgement 4. Abstract 5. Table of Contents 6. Introduction of Project 7. Problem Statement 8. Objectives and Scope 9. Literature Review / Existing System 10. Proposed System 11. System Analysis (DFD, Use Case, ER diagrams) 12. System Design (screens, database, architecture) 13. Implementation Details 14. Testing and Results 15. Conclusion and Future Scope <p>References</p> <p>Project Presentation & Viva</p> <ul style="list-style-type: none"> ● Preparing project presentation (PPT) ● Demonstrating the working project ● Handling viva questions on design, coding, and implementation ● Time management and presentation skills |

VISION

To provide equal opportunities for value based global education for creating an Enlightened Society

MISSION

To establish and facilitate educational institutions in the region for providing affordable value based global education to all who aspire to study and to create opportunities to educators, social workers and philanthropists to serve society

|--------------------------|---|--|--|--|--|----------------|
| Purpose of Course | Conceptualize the students with the theoretical concepts of Operating Systems. | | | | | |
| Course Objective | Familiarization with different objectives of operating system components like process management and inter-process communication; Experiments on process scheduling and other operating system tasks through simulation/implementation under a simulated environment | | | | | |
| Prerequisite | Fundamental knowledge of Computer Organization. | | | | | |
| Course Outcome | <ul style="list-style-type: none"> • Deep understanding of various components of Operating systems. • Case study of Unix operating systems to analyze the different services provided by UNIX Operating System • Design and implement various system calls and concurrent processes requiring synchronization. • Optimum resource management. | | | | | |
| Course Content | Unit- 1: Operating System Concepts 1.1. Operating system fundamental and its types 1.2. Components of operating system 1.3. BIOS, Booting process and kernel 1.4. Functions of operating systems 1.5. Interrupt and System call, Data bus and Address bus | | | | | [6 hrs] |
| | Unit- 2: I/O Device and File Management 2.1 I/O Devices, Device controllers and drivers, DMA, Programmed I/O, Interrupt driven I/O, I/O using DMA 2.2 Disk space Management 2.3 Allocation and Disk Arm Scheduling Methods 2.3.1 FCFS 2.3.2 SSTF 2.3.3 SCAN 2.3.4 C-SCAN 2.4 Drivers for different devices. | | | | | [8 hrs] |

| | |
|---|----------------|
| <p>Unit- 3: Files structure</p> <p>3.1 File storage mechanism, 3.1.1 File allocation table 3.1.2 Directory and File structure, 3.1.3 Attributes, Types, Access, Operations, Protection, and sharing and remote access.</p> <p>3.2 File system management and optimization – 3.2.1 Disk space management 3.2.2 Backup, consistency, Performance 3.2.3 Defragmentation</p> | <p>[7 hrs]</p> |
| <p>Unit- 4: Memory Management</p> <p>4.1 Address space 4.1.1 Contiguous and non- contiguous allocation 4.1.2 Managing free space</p> <p>4.2 Virtual memory 4.2.1 Paging, Page size, Page table, Page fault 4.2.2 Demand Paging 4.2.3 Page replacement algorithms 4.2.3.1 FIFO 4.2.3.2 LRU 4.2.3.3 2nd Chance NRU Optimal Shared page</p> <p>4.3 Segmentation 4.3.1 Implementation of pure segmentation 4.3.2 segmentation with paging.</p> | <p>[9 hrs]</p> |
| <p>Unit- 5: Process Management</p> <p>5.1 Process 5.1.1 Process states 5.1.2 PCB 5.1.3 Process scheduling</p> <p>5.2 Scheduling Algorithms</p> <p>5.3 Study of Round-robin 5.3.1 FCFS 5.3.2 SJF 5.3.3 SRTF 5.3.4 priority algorithms</p> <p>5.4 Overview of deadlock 5.5 Deadlock avoidance, prevention and recovery 5.6 Overview of Inter process communication</p> | <p>[9 hrs]</p> |
| <p>Unit- 6: Security and Protection in operating systems</p> <p>6.1 Main features of security and protection 6.2 Different security concerns 6.3 Ways available in OS to protect the system 6.4 Inbuilt security features of operating system 6.5 Group policy</p> | <p>[5 hrs]</p> |
| <p>Unit- 7: Introduction to Unix operating system</p> <p>7.1 Introduction: History of Unix, features 7.2 Unix system architecture and kernel 7.3 Unix command format</p> | <p>[7 hrs]</p> |

| | |
|--------------------------------------|---|
| | <ul style="list-style-type: none"> 7.3.1 Unix internal and external commands 7.3.2 Directory commands 7.3.3 File related commands 7.3.4 Disk related commands 7.3.5 general utilities <p>Unit- 8: File, Process and memory management in Unix operating systems [9 hrs]</p> <ul style="list-style-type: none"> 8.1 Unix file system <ul style="list-style-type: none"> 8.1.1 Boot inode, super and data block, Directories 8.1.2 Conversion of pathname to inode <ul style="list-style-type: none"> 8.1.2.1 inode to a new file 8.1.3 Disk block allocation 8.2 Process management in Unix <ul style="list-style-type: none"> 8.2.1 Process state and data structures of a process <ul style="list-style-type: none"> 8.2.1.1 User Vs kernel node 8.2.2 Context of a process 8.2.3 Background processes 8.2.4 Process scheduling commands 8.2.5 Process terminating and examining commands 8.3 Storage management in Unix <ul style="list-style-type: none"> 8.3.1 Formatting, making file system 8.3.2 Checking disk space 8.3.3 Mountable file system 8.3.4 Disk partitioning 8.3.5 File compression 8.4 Special tools and utilities <ul style="list-style-type: none"> 8.4.1 Filters, Stream editor SED and AWK 8.4.2 Unix system calls and library functions, Processes 8.4.3 signals and Interrupts, storage and compression facilities 8.5 Basic shell programming concepts. |

|--------------------------|---|
| Purpose of Course | The purpose of the course is to establish foundations of concepts, approaches, methods and techniques artificial intelligence |
| Course Objective | The course aims to develop the ability to design, implement, and evaluate machine learning models for solving real-world problems, with a focus on both theoretical understanding and practical skills using modern tools and techniques. |
| Pr-requisite | Understanding of Statistics, Mathematics and Algorithms |
| Course Out come | After completion of this course, the student will be able to understand and solve real world ML problems, application areas and state of the art ML concepts which are being used in practical implementation. |
| Course Content | <p>Unit 1 : Introduction to Machine Learning [5 hrs]</p> <p style="margin-left: 20px;">1.1 Types of Problem in ML 1.2 Supervised Machine Learning 1.3 Unsupervised Machine Learning 1.4 Reinforcement Learning</p> <p>Unit 2 : Supervised Learning Techniques [7 hrs]</p> <p style="margin-left: 20px;">2.1 Classification 2.2 Naïve Bayes Classifier 2.3 Regression 2.4 Linear Regression</p> <p>Unit 3 Machine Learning Model Implementation -skitlearn [6 hrs]</p> <p style="margin-left: 20px;">3.1 Role of Dataset and Instances 3.2 Train-Test Set, Validation Set 3.3 ML model training-testing process</p> |

| | |
|--------------------------------------|--|
| | <p>3.4 ML Process Flow with sklearn</p> <p>Unit 4 Classification [7 hrs]</p> <p>4.1 Classification: Examples and Applications 4.2 Classification Algorithms -NB , SVM 4.3 Classification Algorithms - KNN 4.4 Rule based ML - Decision Trees</p> <p>Unit 5 Evaluation Metrics for Classification [7 hrs]</p> <p>5.1 Confusion Matrix 5.2 Accuracy and Precision 5.3 Precision and F1-Score 5.4 Evaluation and Fine Tuning of Model</p> <p>Unit 6 Working with Continuous Data Regression [7 hrs]</p> <p>6.1 Multiple Linear Regression 6.2 Polynomial Regression 6.3 Evaluation Metrics for Regression 6.4 Result Visualization</p> <p>Unit 7: Model Validation [6 hrs]</p> <p>7.1 Purpose of Model Validation 7.2 Validation Techniques (Cross-Validations) 7.3 Feature Reduction/Dimensionality reduction 7.4 Generalization, Overfitting, and Underfitting, Relation of Model Complexity to Dataset Size</p> <p>Unit 8: Advanced Machine Learning Concepts [6 hrs]</p> <p>8.1 Introduction to MLOps 8.2 Transfer Learning 8.3 Federated Learning</p> |
| Text and Reference Literature | <ol style="list-style-type: none"> 1. AI an Machine Learning, Vinod Chandra SS, Anans Hareendran S. PHI Publication 2. Machine Learning with Python, Abhishek Vijayvargia, BPB Publication 3. Machine Learning Hand-On for Developers and Technical Professionals, Jason Bell, Wiley Publication 4. | | |
|------------------------------|---|
| <p>Course content</p> | <p>2.3. Virus detection (1st to 4th generation). Anti-virus technologies (Scanners (interceptors, disinfectors, Heuristic). Inoculators, Integrity checkers, NBAR/QoS, anti-virus packages integrity checkers)</p> <p>2.4. Worms : differentiate virus and worms, Morries internet worms (internet worms), change in system administration by first worm, components of worms (Reconnaissance, specific attacks, command interface, intelligence capabilities, unused and non-attack capabilities, communication mechanisms)</p> <p>2.5. Trojans : Logic bombs, Unix backdoors, Phishing, Clickjacking, Scareware.</p> <p>2.6. Business Impact analysis : Event damage (negligible, minor, major), Recovery time (recovery point objective and recovery time objective: disaster recovery plan, Restoration plan).</p> <p>2.7. High availability solutions: Raid, Fault tolerance server, SAN, Network disaster recovery (redundancy, alternative routing, diverse routing, last-mile circuit protection, long-haul network diversity, voice recovery)</p> <p>3. Vulnerabilities [9 Hours]</p> <p>3.1. Vulnerabilities , Threats (categories and sources) and Risk Relationship between Risk, Threats and Vulnerabilities.</p> <p>3.2. Network Vulnerabilities: Overview of vulnerability scanning, Open Port / Service Identification, Version Check, Traffic Probe, Vulnerability Probe, Vulnerability Examples, OpenVAS, Metasploit.</p> <p>3.3. Networks Vulnerability Scanning (Ncat, Socat), Network Sniffers and Injection tools.</p> <p>3.4. Web attack: Browser Attacks, Web Attacks Targeting Users, Obtaining User or Website Data. Email Attacks</p> |
| | <p>4. Threats System and Application [9 Hours]</p> <p>4.1. Threats and Security on Cloud</p> <p>4.2. Threats and Security on IOT</p> <p>4.3. IP and Network Threats and Security</p> <p>4.4. OS Threats and Security / Protection</p> <p>4.5. Administrative Threats and Security</p> <p>4.6. DevOps Threats and Security Automation</p> <p>4.7. Applications Threats and Security</p> <p>5. Introduction to Investigation and digital forensic [9 Hours]</p> <p>5.1. Investigation</p> <p>5.1.1. Understanding digital evidence</p> <p>5.1.2. Evidence collection and handling</p> <p>5.1.3. Data acquisition techniques</p> <p>5.1.4. Chain of custody</p> <p>5.1.5. Hashing and verification</p> <p>5.2. Overview of digital forensic</p> <p>5.2.1. OS Forensic</p> <p>5.2.2. File system analysis</p> <p>5.2.3. Data recovery</p> <p>5.2.4. Image forensic</p> <p>5.2.5. Memory forensic</p> |

| | |
|------------------------|--|
| | <p>5.2.6. Network forensic</p> <p>5.3. Security audit</p> <p>5.3.1. Compliance Audits.</p> <p>5.3.2. Vulnerability Assessments.</p> <p>5.3.3. Penetration Testing.</p> <p>5.3.4. Risk Assessment Audits.</p> <p>5.3.5. Internal Security Audits.</p> <p>5.3.6. External Security Audits.</p> <p>5.4. Introduction to disaster recovery</p> <p>5.4.1. Key elements of cyber attack disaster recovery</p> <p>6. Introduction to Cyber Crime Investigation [9 Hours]</p> <p>6.1. Firewalls and Packet Filters</p> <p>6.2. Password Cracking,</p> <p>6.3. Keyloggers and Spyware,</p> <p>6.4. Steganography</p> <p>6.5. DOS and DDOS attack,</p> <p>6.6. SQL injection,</p> <p>6.7. Buffer Overflow,</p> <p>6.8. Attack on wireless Networks</p> <p>7. Web application scanning tools [6 Hours]</p> <p>7.1. Nikto, W3af, HTTP utilities: Curl, OpenSSL and Stunnel,</p> <p>7.2. Application Inspection tools: Zed Attack Proxy, Sqlmap, DVWA, Webgoat,</p> <p>7.3. Password cracking and brute-force tools: John the Ripper, L0htcrack, Pwdump,</p> <p>7.4. HTC-Hydra</p> <p>8. Introduction to Cyber law [6 Hours]</p> <p>8.1. Cyber crime and legal landscape around the world, IT Act 2000 and its amendments. limitations of IT Act 2000.</p> <p>8.2. Cyber crime and punishments, Cyber laws and legal and ethical aspects related to new technologies- AI/ML, IoT, Blockchain, Darknet and social media, Cyber laws of other countries, Case studies.</p> |

Human Values and Professional Ethics (*Mulya Pravah 2.0*)

| | |
|--|---------------------------------|
| Name of Faculty: Sciences | Department: All |
| Program: B.Sc. (Hons) | Type: AEC |
| Subject: Human Values and Professional Ethics (<i>Mulya Pravah 2.0</i>) | |
| Credit: 02 | Total teaching hours: 30 |
| Course description: This course on “Mulya Pravah” creates a new paradigm towards an equitable world for all. It draws upon the innate space of universal values within individuals and communities to plan and implement strategic change and generate measurable results. It develops the capacity of individuals, groups, and communities to look within themselves to source their inner potential and universal values to ensure that their actions enable justice and equity for all. It strengthens them to envision new patterns and leverages systemic and cultural change and economic and social transformation, through equitable actions. | |
| Learning Outcomes: By the end of the course, students will be able to: <ul style="list-style-type: none">● Understand India’s rich cultural legacy and human values of which we are the custodians.● Focus on professional ethics, which help citizens to discern desirable and undesirable actions● Understand constitutional values, universal values, and holistic education to create integrated citizens. | |

Sarvajanik University
Faculty of Science
B.Sc. (Hons)

Unit-1: Introduction to Indian Ethos **(07 Hours)**

- 1.1 Meaning of ethos and cultural essence of India
- 1.2 Scriptures as the base of the Indian Knowledge System (IKS)
- 1.3 Integrating the two methodologies: interiorization process for self-exploration, and exterior scientific pursuit for the prosperity of world
- 1.4 The Law of Karma and Nishkama Karma (The Law of action and selfless action)

Unit-2: Human Values and Ethics **(08 Hours)**

- 2.1 Knowing the Self and the universal values that we stand for. This is self enquiry & self discovery.
- 2.2 Background conversations and deep listening, recognizing the assumptions that we make the biases we have, and the implications for ethical action.
- 2.3 Self-identity: distinguishing and embracing oneself (and others) four profiles (inner potential, social, professional, personality)
- 2.4 Distinguish ideology, perspectives beliefs from embodying values.

Unit-3: Constitutional Values and Global Citizenship **(07 Hours)**

- 3.1 Values embedded in the Preamble of the Indian Constitution Integration of Human Rights and duties
- 3.2 Directive principles and responsibilities as citizens of India
- 3.3 Sensibility and responsibilities towards global environment, Loksangraha and Vasudhaiva Kutumbakam.

Unit-4: Integrated Personality and Well-being **(08 Hours)**

- 4.1 The three gunas (qualities of sattva—purity and harmony, rajas —activity and passion, tamas —darkness and chaos), the four antah-karanas (inner instruments), and panch kosha (five sheaths).
- 4.2 Stress management: meditated personality and agitated personality.
- 4.3 Oneness, non-duality, and equanimity
- 4.4 Physical, mental, social, and spiritual well-being

| Credit: 02 | Total Learning Hours: 30 Hours |
| <p>The Objectives are to help learners</p> <ul style="list-style-type: none"> • Acquire career skills and fully pursue to partake in a successful career path • Prepare a good résumé • Prepare for interviews and group discussions • Understand the significance of Team Skills • Acquire Team Skills • Design, develop, and adapt to situations as an individual and as a team member | |
| <p>Student Learning Outcome:</p> <p>After completion of the course the student will be able to</p> <ul style="list-style-type: none"> • Prepare their résumé on an appropriate template without grammatical and other errors and using proper syntax. • Actively participate in group discussions towards gainful employment. • Perform appropriately and effectively in group discussions. • Explore and Identify career opportunities. • Demonstrate a set of non-cognitive skills such as empathy, creativity, teamwork, and collaboration, for the smooth and efficient functioning at a workplace. • Actively use and operate online team communication tools, such as: Webinar, Skype, Zoom, Google, and Hangout. • Demonstrate a set of cognitive skills and non-cognitive skills such as critical thinking, problem-solving, ability to learn for maintaining good interpersonal relations, smooth and efficient functioning at a workplace, empathy, creativity and teamwork skills. | |

Unit -1

1.1 Résumé Skills: Preparation and Presentation (03 hours)

- Introduction of Résumé and Related Terms
- Importance of Preparing a Good Résumé
- Difference between a CV, Résumé, and Biodata
- Essential Components of a Good Résumé

1.2 Résumé Skills: Common Errors

- Common Errors
- Guidelines for Résumé Preparation

Unit -2

2.1 Interview Skills: Preparation and Presentation (06 hours)

- Meaning of Interview
- Types of Interviews

- STAR Approach for Facing an Interview
- 2.2. Interview Procedure
 - Dos and Don'ts
 - Important Questions Generally Asked in a Job Interview
- 2.3 Interview Skills: Common Errors
 - Common Errors
 - Interview Questions for Assessing Your Strengths and Weaknesses
- 2.4 Simulation
 - Job Simulation Formats
 - Comment Critically on Simulated Interviews
- 2.5 Demonstrate an Ideal Interview

Unit – 3

3.1 Meaning and Importance of a Group Discussion (GD) (06 hours)

- Meaning of a Group Discussion
- Importance of a Group Discussion
- Types of Group Discussions.

3.2 Procedure of a Group Discussion

- Methodology
- Ground Rules
- Evaluation of a Group Discussion

3.3 Group Discussion: Common Errors

3.4 Group Discussion: Simulation

Unit – 4

4.1 Process of Career Exploration (03 hours)

- Knowing Yourself — Personal Characteristics
- Knowledge about the World of Work, Requirements of Jobs Including Self-employment.
- Sources of Career Information
- Preparing for a Career Based on Potentials of Learners and Availability of Opportunities

Unit –5

5.1 Cognitive Skills: Meaning, types of cognitive skills, strategies to develop cognitive skills. (06 hours)

- Critical Thinking Skills.
- Problem-solving Skills
- Ability to Learn.

5.2 Non-cognitive Skills

- Empathy
- Creativity
- Teamwork
- Collaboration
- Resilience

- Interpersonal skills
- Perseverance
- Social Control
- Social Skill

Unit – 6

6.1 Presentation: Meaning and Types (6hours)

- Meaning of Presentation
- Types of Presentations
- Presentation for Internal and External Communication
- Presentation Strategies
- Ways to Improve Presentation Skills Over Time
