

Report for Youth Conclave at SU

Students of SRKI College actively participated in the Youth Conclave on “Climate Resilience and Sustainable City”, organized by UNICEF, SMC, UHCRCE, and Child Friendly City Knowledge Centre.

Following the motto “Our Campus. Our Data. Our Actions. Our Voice.”, the students collected data from the campuses of 8 constituent colleges of Sarvajanic University (SU) and presented a PPT on the correlation between temperature, humidity, and greenery, their effects, and SMART Solutions.

The students also developed awareness reels, which were used to assess students’ understanding of the correlation between temperature, humidity, and greenery.

The initiative highlighted the active role of youth in promoting sustainable practices and building climate-resilient communities.
