

REPORT ON EDUCATIONAL VISIT

Prathana Maternity & Medical Hospital, Surat

Date of Visit: 1 September 2026

Programme: M.Sc. Clinical Embryology – Semester I

Venue: Prathana Maternity & Medical Hospital, Surat

Host: Dr. Tushar Jhaveri

Introduction

An educational visit to **Prathana Maternity & Medical Hospital, Surat**, was organized on **1 September 2026** for the students of **M.Sc. Clinical Embryology – Semester I**. The visit was planned to provide students with practical exposure to the functioning of a clinical setting and to help them understand the integration of clinical services with assisted reproductive technology and reproductive medicine.

Objectives of the Visit

The major objectives of the visit were to:

- Familiarize students with the functioning and organization of a maternity and medical hospital.
- Provide practical insight into various aspects of reproductive and fertility-related clinical services.
- Help students understand the role of different healthcare professionals in patient care.
- Connect theoretical concepts studied in Clinical Embryology with their clinical applications.
- Develop students' understanding of professional ethics, patient confidentiality, communication, and clinical practices.

Visit Highlights

During the visit, students were introduced to the hospital environment and gained an overview of the various clinical services and facilities. **Dr. Tushar Jhaveri** interacted with the students and provided valuable insights into reproductive medicine, patient management, and the clinical aspects associated with fertility care.

The students were encouraged to observe the workflow of the clinical setting and understand how clinical, laboratory, and support services work together in providing comprehensive care. The interaction also enabled students to appreciate the importance of interdisciplinary coordination, ethical practices, communication with patients, and maintaining confidentiality in reproductive healthcare.

The visit provided an opportunity for students to clarify their queries and relate classroom-based learning to real-world clinical practices. It also helped them gain a better understanding of the

professional responsibilities and skills expected from a Clinical Embryologist working within a multidisciplinary reproductive healthcare team.

Learning Outcome

The educational visit enhanced students' **clinical orientation and professional understanding** and provided meaningful exposure to the practical environment of reproductive healthcare. Students gained a broader perspective of the clinical pathway and the importance of teamwork between clinicians, embryologists, nurses, counsellors, and other healthcare professionals.

Conclusion

The visit to Prathana Maternity & Medical Hospital was an enriching academic experience for the M.Sc. Clinical Embryology Semester I students. Such field-based learning opportunities complement classroom teaching and contribute towards developing competent, ethically responsible, and clinically oriented professionals in the field of Clinical Embryology.
